

# Automatic Deduplication

To understand duplication problem and how automatic deduplication is used, read article [Deciding Whether to Use Automatic Deduplication](#).

To enable automatic deduplication:

1. Go to [blocked URL](#) > **Settings** > **NetFlow Settings** > **Configuration** > **Automatic Deduplication**
2. **Select Enable**

The screenshot shows the 'Configuration' tab in the NetFlow Settings interface. The 'Automatic Deduplication' dropdown menu is highlighted with a red box and is set to 'Enabled'. The 'Save' button is visible at the bottom left.

Patterns	Subnets	Subnet Sets	TopN	Alarms	Reports	Aggregator Filtering	Sampling	Configuration
<b>▼ Import ▲ Export</b>								
Service options								
Collection port	2055							
Collection port timeout	5 seconds							
Temp folder	/var/lib/netvizura/flow/temp							
Archived files folder	/var/lib/netvizura/flow/archive							
Legacy raw files folder	/var/lib/netvizura/flow/legacy							
Maximum database size	100 GB							
Minimum free disk space	2048 MB							
Database size in weeks	52							
Minimum archive size in days	3							
Automatic Deduplication	Enabled							
<input checked="" type="checkbox"/> Save <input type="checkbox"/> Cancel								

In order to achieve automatic flow deduplication in Traffic Patterns and Subnet Sets, it is required that **ALL** devices in flow continuity are configured as exporters.
