

I can not set the OID value on a device

There are two possible reasons for not being able to set the OID value on a device:

- Policy used to access device is READ instead of READ_WRITE (application settings)
- SNMP configuration on a device itself has no write privileges

To check privileges of a policy go to **Settings > Control Panel > SNMP Policies** and double click on the policy. If the problem persist, contact your network engineers to check if the SNMP configuration on a device is READ only.

In order to get the Set OID option, you need to have write or administrator privileges.
