

Inspecting Flow Records (Raw Data)

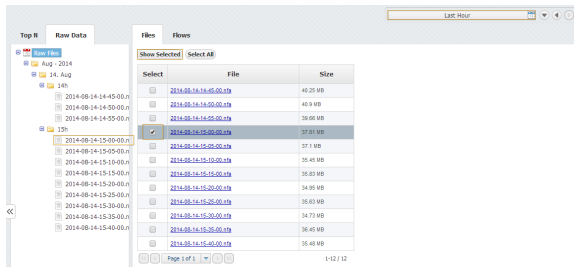

Raw Data files store flow records exported in a 5-minute interval.

Raw Data Tree groups Raw Data files in folders according to day/hour/minute. Selecting a node from the tree allows inspection of specific Raw Data files.

Inspecting Raw Data

To inspect Raw Data:

1. Go To **NetFlow > Raw Data > Files**
2. **Specify time period** in Time Window. The main panel and Raw Data Tree will show gathered files
3. **Select files** you want to inspect from the Main Panel (or alternatively, select a single file from Raw Data Tree)
4. Click **Show Selected**

Raw Data table shows flow records from the selected Raw Data file(s). Data can be filtered, grouped and sorted the by almost any field (source IP address, Bytes, Protocol etc.).

[illegible]

Exporting Raw Data

Raw Data table can be exported as a CSV file in order to present captured netflow records as a report to a third party or for further analysis.

To export Raw Data, click on the the **Export** button in the upper right corner of the Raw Data Table.

[illegible]

Grouping, filtering and sorting the raw data table will affect the CSV as well. This will also make a CSV file much smaller.

Depending on the amount of data, export can last a couple of minutes

Depending on your browser settings, browser may ask you where to save the file or it will save the file to a default folder (usually **Downloads** folder). Some spreadsheet software may ask you which separator to use when opening the file - select **Comma**.
