I can not find an OID in the MIB tree

There are two possible reasons for not being able to find an OID in the MIB tree:

- OID number or name is mistyped
- MIB containing the OID is not in the application database

Double check the OID number or name first.

If this is OK, then you need to add a MIB containing the OID to the application. Download the MIB (from vendor website for instance) and then add it to the database by going to blocked URL **> Settings > MIB Settings > Modules**.

> ⓘ   For more info on adding a MIB, go to article Configuring MIB Modules.
