

Create a chart

To create a chart on Dashboard follow the procedure described in this chapter:

1. To enter into Edit dashboard mode, press **vertical ellipsis symbol** in the top right corner. From the provided menu, choose **Edit**.
-

2. In the top right corner, there is a **button on Add Graph**, that opens Add Graph pop-up.
-

3. If you were browsing through the NetFlow Analyzer module, Add Graph pop-up fields are going to be populated with data belonging to the last chart you were analyzing.

In case you want to start building a chart from scratch, press the **Reset button** in the top right corner of the pop-up.

Otherwise, check every field to determine whether you would like to make some customization and press **OK button** to save the chart on the dashboard.

To learn more about Add Graph pop-up fields read [Add and Edit Graph pop-up fields](#).

- 3a. In case you go directly to Dashboard to create a chart, Add Graph pop-up will be **blank**. Fill out the fields in their particular order with desired values (in the direction of arrow).

In any given moment, it is possible to return and change the field value. Once the chart is created, click on the **OK button** will save the chart on the dashboard.

To learn more about Add Graph pop-up fields read [Add and Edit Graph pop-up fields](#).

At any time, it is possible to decide not to create a new chart by clicking on the **Cancel button**, located in the bottom right corner.
