

Add and Edit Graph pop-up fields

At any stage, you can add or edit charts on your dashboard. The aforementioned operations are performed by using Add Graph and Edit Graph functionalities. Both options are composed of the same set of fields that need to be populated to have a functioning chart:

1. Node Type
2. Node Name
3. View
4. Options
5. Measure
6. Unit
7. Graph Type
8. Legend
9. Title.

Moreover, on the right side of the pop-up, there is a Preview that allows you to observe the chart while it is being created.
